System-Wide Priorities: Management of Hospital Utilization

Complete the check boxes to indicate which strategies you use to minimize utilization of state and community hospitals, including emergency departments. A single strategy may be applicable to multiple populations. For each strategy that you use, identify the target population(s):

- *Freq. State Hosp:* Population with frequent state hospital admissions (ten or more psychiatric hospitalizations in the past five years with at least one admission in the past one year)
- *LT State Hosp:* Population with long-term state hospital stays (one year or longer)
- *Local Hosp/ER:* Population with high utilization of community hospital and emergency services for psychiatric issues (as defined by LMHA/local stakeholders)
- *Population on forensic commitments (Forensic)*

Mental Health Block Grant Inventory of Services

The following table identifies the components of the “Good and Modern Addictions and Mental Health Service System” defined by SAMHSA. It reflects the full range of behavioral health services, including substance abuse services and excluding IDD services. These inventories are for information only and do not define DSHS requirements. SAMHSA has posted a description of the Good and Modern system on its website: http://www.samhsa.gov/healthreform/docs/good_and_modern_4_18_2011_508.pdf.

The survey is for behavioral health services available to individuals eligible for DSHS-funded services. For each service listed:

- Identify which age groups (if any) currently receive or have access to the service in your local service area, either through the LMHA (regardless of funding source) or elsewhere in the community.
- Identify the approximate percent of service area in which the service is available. It is acceptable to enter the percent of counties in which the service is available.
- Indicate whether the service is provided through the LMHA, through another community provider, and/or through collaboration between the LMHA and one or more community partners. Check as many columns as applicable.
